

# **NONPOINT SOURCE (NPS) POLLUTION**

## **REQUIREMENTS OF A NPS CONTROL IMPLEMENTATION PROGRAM**

**All Implementation Programs Must Include the Following:**

**Key Element 1:** The Program's purposes must be designed to meet water quality objectives and discharger requirements.

**Key Element 2:** Dischargers must identify the management practices (MPs) they expect to implement, as well as the MP selection and verification process.

**Key Element 3:** A time schedule with verifiable milestones must be established.

**Key Element 4:** To determine whether the implementation program is being successful, or if additional measures are needed, an appropriate monitoring program must be implemented.
